

## → George Best Corner

Project – Woodstock Link, Belfast (George Best Corner)

Contractor – Northstone

Architect – The Paul Hogarth Company

Client – CPD

This project is one of a number in East Belfast where the Paul Hogarth Company have been asked to produce a scheme to improve the area. A standard pallet of materials have been chosen to help Road services with any potential Future maintenance. The kerbs and channels have been supplied in G682 Buff bush hammered granite to match existing kerbs while the paving chosen is our Chevin grey buff sandstone which lifts the mood and tone of the area and compliments the buff granite.

Other schemes using this pallet of materials include, Newtonards Road, Hollywood arches and Castlereagh. And Cunningham Square, Ebrington Barracks Derry / Londonderry.
